| 2023 – present | <b>AI Researcher → Co-Founder &amp; CAIO (2026), Memcara (memcara.com)</b><br>Led agent UX design and engineering deployment of multimodal AI systems to support caregivers in long-term care facilities, combining video analysis, EHR data, and smart-glasses and chat-based just-in-time adaptive interventions (JITAI). Developed systems including CareInsights 🔗 IMWUT '25, Family in the Loop 🔗 CSCW '25, and CareWare, which integrate dementia-specific AI-generated insights and clinical context directly into caregiver workflows. These systems are currently deployed across more than a dozen facilities in the northeastern United States, extending research from my PhD thesis into real-world care environments. |
| 2025 – 2026    | <b>Co-Founder &amp; CAIO, Companion IQ (companioniq.org)</b><br>Led agent UX design and development of personalized, longitudinal interactions for myaicompanion.org, an AI companionship and daily check-in platform for older adults, serving 200+ daily active users. Raised >\$1M in seed funding. Ongoing partnerships and clinical trials, including with Veterans Affairs (VA).                                                                                                                                                                                                                                                                                                                                              |
| 2021           | <b>Software Engineer, YouTube (Google)</b><br>Helped implement the “Super Thanks” crowdfunding feature as a full-time SWE working in TypeScript and C++ on the Paid Digital Goods Team.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 2018 – 2021    | <b>Software Engineer, Lark Health (lark.com)</b><br>Helped build what was then the world’s largest AI healthcare provider, focused on personalized, holistic AI health coaching for patients at risk for chronic diseases. One of two full-stack mobile engineers when I joined; led our app’s transition to React Native and refactored our backend into microservices. During my time, Lark tripled in headcount and raised a \$70M Series C. <i>TypeScript, Python, Node.js</i>                                                                                                                                                                                                                                                  |
| 2011 – 2016    | <b>Engineering Internships: Google (2), PayPal, Makani Power (Google X)</b><br>Google: built ad extensions for AdWords and extended a Knowledge Graph data pipeline ( <i>Dart, Angular, Java, C++</i> ). PayPal: designed and built a metrics dashboard for the Core Payments team ( <i>JavaScript, Python</i> ). Makani: helped manufacture self-guided kites for high-altitude wind turbines ( <i>SolidWorks, CNC</i> ).                                                                                                                                                                                                                                                                                                          |

## TEACHING

**TA at Stanford & Dartmouth** (11 quarters): CS221 (AI), CS147 (HCI), CS181 (Ethics), CS109, CS106A/B, ENGM 191, Code in Place. **Workshop leader at TUMO** (2019–2022): Designed and taught high school courses on AI and interactive storytelling in Berlin, Beirut, and Yerevan. **Mentor:** UC Berkeley Fung Fellowship (2021), Stanford CS + Social Good (2020).

## AWARDS

Rilla NYC Hackathon Winner (2025) · Dartmouth Digital Health Summit 3rd Place (2023) · SF Arthouse Short Festival First Place (2022) · Dartmouth Guarini Alumni Research Award (2022) · Dartmouth Innovation Fellowship (2021) · Dartmouth CompX Faculty Grant (2021) · Armenian Professional Society Scholarship (2021) · Stanford Teaching Honors (2017) · Eagle Scout (2012) · Intel ISEF 3rd Place, Physics & Astronomy (2011)
